BAVIGADDA PRUDHVIRAJ

Cultivate a passion for back-end software development, emphasizing the design and enhancement of scalable applications to meet diverse client needs and industry standards. Targeting opportunities in software engineering, particularly in cloud-native solutions and API engineering.

6302610681 | prudhviraj729@gmail.com | GitHub | LinkedIn | Hackerrank | Portfolio

PROFILE SUMMARY

- Accomplished Back-end Software Engineering professional with nearly 4 years of experience in designing, developing, and deploying scalable enterprise applications using Java, Spring Boot, Microservices, and cloud-native technologies.
- Proficient in back-end application development, microservices architecture, REST API engineering, database management, performance optimization, and cloud-native solution design, delivering secure, scalable, and high-performing software systems.
- Experienced in leveraging Java, Spring Boot, Spring Cloud, Docker, Kafka, Redis, PostgreSQL/JPA, and modern software development methodologies to build resilient, maintainable, and distributed applications across Agile environments.
- Skilled in software architecture, system integration, observability, CI/CD, environment deployments, testing, debugging, and application monitoring, ensuring software quality, operational stability, and seamless production releases.
- Collaborative engineering professional with strong expertise in cross-functional stakeholder engagement, problem-solving, technical execution, and continuous learning, consistently contributing to engineering excellence and business-driven technology solutions.

CORE COMPETENCIES

Backend Software Development	REST API Design & Integration	Enterprise Application Development
Java & Spring Boot Development	Cloud-Native Application Development	Performance Optimization & System Reliability
Microservices Architecture & Development	Distributed Systems & Backend Engineering	API Engineering & Integration Services

SOFT SKILLS

Team Collaboration | **Communicator** | **Agility** | **Adaptability** | **Change Agent**

WORK EXPERIENCE

Nov'25 – Present

Software Development Engineer | MobileProgramming.com (Client: AJIO – Reliance Retail)

- **Technical Leadership & Product Ownership:** Leading the architecture, development, and delivery of **three enterprise pricing optimization platforms—Offline Benchmarking, Online F&M (Fashion & Lifestyle), and AJIO Pricing**—driving end-to-end solution ownership from **0-to-1 product development**, architecture design, team setup, and production deployment.
- **Pricing Engine & Business Rules Development:** Designed and developed **rule-driven pricing optimization engines** that process large-scale retail pricing, margin guardrails, promotional events, and sales data to recommend optimized product pricing for Reliance Retail businesses, maximizing profitability while adhering to configurable business rules.
- **Scalable Distributed Systems Engineering:** Built high-performance, distributed microservices using **Java 21, Spring Boot, Apache Kafka, Google Kubernetes Engine (GKE), Google Cloud Platform (GCP), Databricks, and BigQuery**, enabling reliable processing of **millions of pricing records** with optimized performance and scalability.
- **Architecture, DevOps & Cloud Engineering:** Established cloud-native deployment architecture leveraging **GitHub, Azure Repositories, GCP Workloads, Kubernetes Engine, Kafka, BigQuery, and Databricks**, ensuring scalable deployments, streamlined CI/CD workflows, real-time data processing, and production monitoring.
- **Engineering Governance & Code Quality:** Led engineering governance by reviewing all pull requests across the platform, defining architecture standards, mentoring development teams, driving performance optimization, and ensuring high-quality software delivery through structured code reviews and technical oversight.
- **AI-Assisted Engineering & Developer Productivity:** Integrated **AI-powered coding agents** into the development lifecycle to automate code reviews, recommend performance improvements and database indexing, and generate design documentation, significantly improving engineering productivity, code quality, and documentation consistency.
- **File Processing & Data Handling:** Developed and optimized Excel file processing workflows for large-volume data ingestion, validation, transformation, and rule-based processing to support pricing computations and downstream business operations**.**
- **Technical Interviewing & Talent Assessment:** Conducted technical interviews to evaluate candidates' technical expertise, coding proficiency, problem-solving capabilities, and overall role suitability for engineering teams.
- **Technical Hiring & Team Development**: Partnered with hiring managers and cross-functional stakeholders in the technical recruitment process, assessing candidate competency and contributing to the selection of high-performing engineering talent.

Jun'22 – Mar'25

Virtusa | Associate Engineer

- **Application Development & Engineering**: Developed, enhanced, and maintained scalable backend applications by translating business requirements into robust, secure, and high-performance software solutions.
- **Software Design & Technical Implementation**: Implemented object-oriented design principles, reusable components, and coding best practices to build maintainable, extensible, and production-ready applications.
- **System Performance & Code Quality**: Optimized application performance, conducted code reviews, resolved production issues, and implemented debugging and testing practices to improve software quality and reliability.
- **Release Management & SDLC Execution**: Participated in end-to-end software development lifecycle activities, including requirement analysis, development, testing, deployment, defect resolution, and production support within Agile environments.
- **Cross-Functional Collaboration & Continuous Improvement**: Collaborated with product owners, architects, QA teams, and stakeholders to deliver business-critical features while driving process improvements, technical documentation, and knowledge sharing.

EDUCATION

- B.Tech. in Electrical Engineering – Godavari Institute of Engineering and Technology, Andhra Pradesh | 2022 | CGPA: 7.9/10

CERTIFICATIONS

- **Scaler Skill Mastery Certifications (2025)**
  - Data Structures & Algorithms
  - Data Structures & Algorithms (Advanced)
  - Java
  - Back-end Development – Java Spring/Spring Boot
  - Low Level Design (LLD)
  - High Level Design (HLD)
  - Databases & SQL
- **Oracle Certified Associate, Java SE 8 Programmer | 2022**
- **Spring REST | 2022**
- **Learn Spring Boot in 100 Steps – Beginner to Expert | 2022**
- **Git & GitHub: Working with Git Repositories | 2022**
- **Learn Spring and Spring Boot 10x Productive Java Development | 2022**

TECHNICAL SKILLS

- **Programming Languages:** Java (SE 8, Java 21, Advanced Java), SQL
- **Frameworks & Technologies:** Spring, Spring Boot, REST API Development, Microservices
- **Data Structures & Algorithms:** Core DSA, Advanced DSA
- **Databases & Data Platforms:** SQL, BigQuery, Databricks
- **Cloud & Infrastructure:** Google Cloud Platform (GCP), Google Kubernetes Engine (GKE), Cloud-Native Architecture
- **Messaging & Distributed Systems:** Apache Kafka, Distributed Systems, Pricing Optimization Engine, Rule Engine
- **Version Control, DevOps & Collaboration:** Git, GitHub, Azure Repositories, CI/CD
- **AI & Engineering Practices:** AI Coding Agents, Performance Optimization

PERSONAL DETAILS

Date of Birth: 24th May 2001 | Languages Known: English, Telugu, Hindi, Kannada, Tamil | Address: Bengaluru, Karnataka

PROJECTS - ANNEXURE

Virtusa | Associate Engineer
June 2022 – March 2025

Backend Development

- Designed and developed **back-end modules** using **Java, Spring Boot, and Redis**, delivering scalable solutions.
- Built and maintained **back-end services** using **Java, Spring Boot, JPA, and REST APIs**, ensuring stability and scalability.

API Development & Performance Optimization

- Architected **RESTful APIs** for seamless integration with **front-end systems** and **third-party platforms**.
- Optimized APIs through **code refactoring**, improving **system performance and efficiency by 10%**.

Agile Delivery & Quality Assurance

- Participated across the **full Software Development Life Cycle (SDLC)** within **Agile sprints**, ensuring timely and quality releases.
- Conducted **functional testing** using **Postman**, reducing **post-release defects by 10%**.

Deployment, Monitoring & Reliability

- Performed deployments to **Development** and **Test** environments using **Spinnaker**, ensuring stable releases across branches.
- Utilized **Kibana** for **log analysis, tracing, and issue debugging**, enhancing system reliability and reducing resolution time.
- Strengthened **system uptime** and consistently achieved/exceeded **SLA targets**.

Banking Microservices Application | Personal Project
March 2025 – May 2025

Cloud-Native Architecture & Microservices

- Built a **cloud-native banking solution** using **Java, Spring Boot, and Spring Cloud** following **microservices principles**.
- Configured **Spring Cloud Eureka Server** to enable **dynamic service discovery, registration, and load balancing**.
- Used **Spring Cloud Config Server** for **centralized and dynamic configuration management** across all services.

API Gateway & Security

- Deployed **Spring Cloud Gateway** for **centralized request management and routing**.
- Integrated **OAuth2** with **Spring Security** for **authentication and authorization**.

Resilience & Event-Driven Architecture

- Applied **Resilience4j** with **circuit breakers** and **retry logic** to improve **fault tolerance**.
- Integrated **Apache Kafka** for **asynchronous message-driven communication** among microservices.

Containerization & Observability

- Packaged services into **Docker containers** for **scalable deployment and portability**.
- Implemented an **observability stack** using **Prometheus, Loki, Promtail, Tempo, and Grafana** for **metrics, logs, tracing, visualization, system health monitoring, and faster issue resolution**.
